

Post-doctoral Research Associate

Department of Clinical Biochemistry

Closing Date: 9th April 2025

Job Reference: RG45331

Post-doctoral Research Associate

Salary:

£37,174 - £45,413

Contract:

Fixed Term – 2 years

Location:

Cambridge

Faculty / Department:

Clinical Biochemistry

Responsible to:

Dr Daniel Fazakerley

Working Pattern:

Full Time (Part-time considered)

Purpose of the role

We are seeking a Postdoctoral Research Associate to investigate glucose metabolism and insulin resistance in a human iPSC-based model of skeletal muscle.

The position is based in the laboratory of Dr Daniel Fazakerley at the Institute of Metabolic Science at the University of Cambridge. The position is part of a UKRI-funded project in collaboration with the Lieberam lab at King's College London and Song Lab at UCL.

The Postdoctoral Research Associate will develop a scalable 3D-coculture system to investigate insulin responses in muscle. The culture system combines motor neurons and myofibers directly derived from human iPSCs into a multi-well device suitable for high content imaging. Myofibers will carry a fluorescent reporter transgene, allowing us to track the intracellular movement of the insulin-regulated glucose transporter GLUT4.

The successful applicant will use cutting-edge molecular and cell biology techniques, in combination with a range of phenotyping and imaging techniques to provide new insight into the control of insulin sensitivity in muscle cells. This position is an ideal opportunity for a highly motivated scientist to develop their career in cell biology (including iPSC culture), signalling and membrane trafficking in the context of metabolic disease in a world-class research environment and with access to a network of collaborators.

Key responsibilities

- Run a program of research to develop a new muscle model to study insulin-regulated glucose metabolism;
- Drive method development for manipulation of gene expression in differentiated myocytes;
- Genetically modify the genome of human iPSCs to introduce reporter genes and mutations associated with type 2 diabetes;
- Run collaborative projects with other groups in Cambridge, nationally, and internationally;
- Present research work and data within the Institute, nationally and internationally and to prepare and submit research for publication in peer-reviewed journals;
- Assist in supervising graduate students and other members of the research group and aid in teaching standard molecular biology/biochemistry techniques and cellular imaging techniques;
- Assist the Principal Investigator in preparation of manuscripts and proposals/applications to funding bodies.

The Fazakerley lab are interested understanding how insulin regulates glucose transport into fat and muscle cells, and how this process breaks down in disease.

One of the ways in which insulin lowers blood glucose after a meal is through stimulating glucose transport into adipose and muscle tissue. Insulin activates a signal transduction cascade in these tissues to promote the translocation of the glucose transporter GLUT4 from specialised intracellular storage vesicles to the plasma membrane, facilitating glucose uptake. We currently have an incomplete understanding of the signalling events and trafficking processes that control the redistribution of GLUT4. We aim to fill these knowledge gaps.

The reason we want to increase our understanding in this area is that impaired insulin-stimulated glucose transport in muscle and fat is a major contributor to whole body insulin resistance – a state where insulin no longer efficiently lowers blood glucose and a risk factor for type 2 diabetes. There is currently no consensus on the molecular basis for impaired insulin responses in these tissues, nor are there any current pharmacological interventions that directly target insulin-stimulated glucose transport.

One major barrier to our understanding of insulin-stimulated glucose transport is the lack of good cell culture-based muscle models for studying insulin action. Muscle is the major site of glucose disposal after a meal, yet most of our understanding of insulin-regulated glucose transport comes from studies in cultured fat cells. This project aims to overcome this obstacle and generate a cell culture model that recapitulates insulin action in muscle tissue *in vivo*.

Our lab utilises an interdisciplinary approach comprising cell culture and *in vivo* models to study insulin action, GLUT4 trafficking and glucose metabolism. We design and perform unbiased omics studies to uncover genes/proteins or protein post-translational modifications (e.g. phosphorylation) that may play a role in insulin-stimulated GLUT4 trafficking and/or insulin resistance. We use our expertise in cell biology (e.g. microscopy) and biochemistry (e.g. subcellular fractionation, immunoprecipitation) techniques to study the role that proteins-of-interest play in the insulin signalling-GLUT4 pathway in health and disease. These studies will provide new information on how insulin-regulated glucose uptake is coordinated and identify novel regulators of glucose transport in adipose and muscle tissue.

Person Specification

Criteria	Essential	Desirable
Education		
PhD in cell biology or biochemistry or metabolism, or related discipline.	✓	
Relevant knowledge and experience		
Research experience in broad range of molecular and cell biology techniques.	✓	
Experience with maintaining cells in culture (ideally iPSCs), and techniques for genome editing and/or siRNA and plasmid DNA delivery	✓	
Practical experience and expertise in microscopy techniques and expertise in image analysis		✓
Detailed knowledge of insulin signalling and/or membrane trafficking and/or insulin resistance		✓
Knowledge of genome engineering workflows such as CRISPR design and delivery to mammalian cells, screening strategies, and clone selection and expansion		✓
Knowledge of insulin action/glucose metabolism		✓
Additional skills		
Excellent organisational and time management skills	✓	
Reliability and ability to deliver outcomes by pre-agreed deadlines	✓	
Willingness and ability to impart knowledge and skills to graduate students and other members of the research team including graduate students	✓	
Excellent communication skills, as supported by clarity of written and oral presentations	✓	
An interdisciplinary and collaborative research approach	✓	
Excellent interpersonal skills, preferably supported by past contributions to collaborative projects	✓	
Ability to prepare and analyse data for publication in scientific journals and to present scientific data to peers in seminars and at conferences	✓	

Behavioural Attributes

This section summarises the behavioural attributes (or competencies) that we expect the role holder to be able to demonstrate, at what level and whether this is an essential or desirable requirement.

Full definitions are at: <https://www.hr.admin.cam.ac.uk/policies-procedures/behavioural-attributes>

Please review these and provide specific examples in your application of how you have demonstrated these attributes in your work, education or other experience. It will assist your application if you explain the situation, what you did and what the outcomes were.

Attribute	Level
Valuing Diversity	A
Achieving Results	B
Communication	B/C
Innovation and Change	C
Negotiating and Influencing	C
People Development	C
Relationship Building	B
Strategic Focus	C

Institute of Metabolic Science-Metabolic Research Laboratories and embedded MRC Metabolic Diseases Unit (Clinical Biochemistry)

Research and research culture

Research at the IMS-MRL is dedicated to understanding the mechanisms responsible for obesity and related metabolic diseases, with the specific aims of undertaking high quality basic science clinical and translational research to improve understanding of and develop interventions to prevent and treat these conditions.

The Institute brings together outstanding scientific and clinical researchers from 24 laboratories to form an internationally renowned centre of excellence for research into metabolism and metabolic disease.

It encompasses scientists working across the full spectrum of experimental approaches including cell biology, genetics, functional genomics, electrophysiology, animal models, basic and human neuroscience and experimental medicine.

Our investigators range from basic scientists undertaking underpinning research on fundamental aspects of cellular metabolism to clinical neuroscientists investigating human appetitive behaviour. Together, this creates a wide range of basic, clinical and translational research expertise and a superbly enriching research environment that benefits from established links with research institutes throughout the Cambridge area, such as with the MRC Epidemiology Unit, Wellcome Trust Sanger Institute and European Bioinformatics Institute, among others.

A major aim of the institute is to facilitate cross-disciplinary interactions between basic and clinical scientists to maximise the impact of our research and improve the quality of patient care.

The MRC Metabolic Diseases Unit (MDU), which is based at the IMS-MRL, is part of a

joint initiative between the MRC and Wellcome Trust that supports obesity research in Cambridge. The MDU, established in 2013, was the first MRC-University unit to be developed from scratch.

The MDU provides direct support for five high-quality programmes of research that aim to improve understanding of the basic mechanisms responsible for obesity and related metabolic diseases. The MDU, together with funding from Wellcome and the NIHR Biomedical Research Centre, supports key core facilities vital to the work of investigators based at the IMS-MRL and in the surrounding area. Such close ties with local Units and Institutes provide MDU scientists with unique opportunities to explore the genetic, epigenetic and physiological bases of obesity and metabolic disease.

We believe we have a responsibility to contribute to society through our public engagement programme. Our aim is to inspire the next generation of scientists, impact the public perception of fundamental research and make public engagement part of our research culture.

We actively pursue equality and diversity in the workplace, supported by the Silver Athena Swan Award to the Clinical School.

The Institute is committed to promoting energy efficiency and to minimising our environmental impact. Our efforts in this area have been recognised through achieving annual 'Gold' accreditation in the University's Green Impact scheme for departments and colleges across the University in for 2015-2019.

School of Clinical Medicine

Doing great work in a great place to work

About the School

The School of Clinical Medicine currently employs nearly 3,000 people, spanning all varieties of staff type from Academic Professors to administrative support.

In 1976 in response to the recommendation of the Royal Commission on Medical Education in the late 1960's, a complete medical course was re-established in Cambridge with the opening of the School of Clinical Medicine at the new Addenbrooke's Hospital site.

On 21st November 1980, HRH The Duke of Edinburgh, the Chancellor of the University of Cambridge, officially opened the Clinical School Building which presently accommodates the medical library, lecture theatres and seminar rooms.

The University of Cambridge School of Clinical Medicine aspires to change the practice of medicine and improve biological understanding in a wide range of clinical specialties and scientific disciplines. Collaborative research, both within biomedicine and crossing the boundaries to the mathematical, physical and social sciences, is key to our approach. The School also supports key enabling technologies and facilities in imaging, bioinformatics and biological systems. The main areas of research interest are:

- Cancer research
- Cardio-Respiratory Medicine
- Cellular mechanisms of disease
- Diabetes, Endocrinology and Metabolism
- Epidemiology, Public Health and Primary Care
- Genetics and Genetic Medicine
- Haematological and Transplantation Medicine
- Infection and Immunity
- Neurosciences and Mental Health
- Stems Cells and Regenerative Medicine.

Professor Patrick Maxwell, Regius Professor of Physic and Head of the School of Clinical Medicine

The School aims to provide leadership in education, discovery and healthcare. It will achieve this through; inspirational teaching and training, outstanding basic and clinical research and integration of these to improve medical practice for both individual patients and the population.

The School will:

Through inspirational teaching and training, educate individuals who:

- will become exceptional doctors or biomedical scientists
- combine a depth of scientific understanding with outstanding clinical and communication skills demonstrate a caring, compassionate and professional approach to patients and the public and
- are equipped to become future international leaders of their profession.

Through its commitment to the pursuit of excellence, support scientists of international standing in basic and clinical research aiming to:

- understand fundamental biology and thereby the mechanisms underlying disease integrate basic and clinical research
- apply a rigorous mechanism-based approach to clinical problems and
- innovate to solve the health challenges of our society.

Terms of Appointment

Tenure and probation

Appointments will be made on a fixed -term basis for a period of 2 years because your employment relies on the availability of finite funds. Appointments will be subject to satisfactory completion of a six month probationary period.

Hours of Work and Working Pattern

The hours of work for the position are of full-time, working Monday – Friday.

Pension

You will automatically be enrolled to become a member of USS (Universities Superannuation Scheme) – a defined benefits pension scheme. For further information please visit: www.pensions.admin.cam.ac.uk.

Annual leave

Full time employees are entitled to annual paid leave of 41 days inclusive of public holidays. For new part-time employees, annual leave will be pro rata'd based on days worked.

General information

Pre-employment checks

Right to work in the UK

We have a legal responsibility to ensure that you have the right to work in the UK before you can start working for us.

If you do not have the right to work in the UK already, any offer of employment we make to you will be conditional upon you gaining it.

Health declaration Once an offer of employment has been made the successful candidate will be required to complete a work health declaration form.

Qualifications The person specification for this position lists

qualifications that are essential and/or desirable. Please note that if you are offered the post you will be asked to provide your relevant original certificates of these qualifications.

References: Offers of appointment will be subject to the receipt of satisfactory references.

Equality and Diversity

We particularly encourage women and /or candidates from a Black, Asian and Minority Ethnic background to apply for this vacancy as they are currently under-represented at this level within our University. **(Please see relevant guidance before inclusion:**

<https://www.hr.admin.cam.ac.uk/recruitment/equality-law-and-recruitment/exceptions-equality-law/positive-action>)

Information if you have a disability

The University welcomes applications from individuals with disabilities. We are committed to ensuring fair treatment throughout the recruitment process. We will make adjustments to enable applicants to compete to the best of their ability wherever it is reasonable to do so and, if successful, to assist them during their employment.

Information for disabled applicants is available at <http://www.admin.cam.ac.uk/offices/hr/staff/disabled/>

We encourage you to declare any disability that you may have, and any reasonable adjustments that you may require, in the section provided for this purpose in the

application form. This will enable us to accommodate your needs throughout the process as required. However, applicants and employees may declare a disability at any time.

If you prefer to discuss any special arrangements connected with a disability, please contact, the Department Administrator who is responsible for recruitment to this position. Alternatively, you may contact the Clinical School Recruitment Team who are responsible for recruitment to this position via:

cshrstaffhub@admin.cam.ac.uk

The University

The University of Cambridge is one of the world's oldest and most successful universities. We are a renowned centre for research, education, and scholarship that makes a significant contribution to society. The University is consistently ranked amongst the top universities in the world. Our affiliates have won more Nobel Prizes than any other University.

Our sustained pursuit of academic excellence is built on a long history of first-class teaching and research within a distinctive collegiate system. For eight centuries our ideas and innovations have shaped the world. Our principal goal is to remain one of the world's leading universities in an increasingly competitive global higher education sector. Today the University of Cambridge is at the centre of a cluster of over 4,300 businesses employing 58,000 people.

Our capital investment projects include the West Cambridge site, the North West Cambridge development and the growth of the Biomedical Campus in the south of the city. The North West Cambridge development includes the opening of a primary school – the first in the UK to be managed by a University. So we are deeply embedded in, and committed to serving, our local community. These are all conspicuous signs of a University that is not only adapting to new needs, but also anticipating the future.

Our mission is to contribute to society through the pursuit of education, learning, and research at the highest international levels of excellence. Our core values are:

- freedom of thought and expression; and
- freedom from discrimination.

About Us

The University is one of the world's leading academic centres. It comprises 150 faculties and departments, together with a central administration and other institutions. Our institutions, museums and collections are a world-class resource for researchers, students and members of the public representing one of the country's highest concentrations of internationally important collections.

The University has an annual income of £2 billion. Research income, won competitively from the UK Research Councils, the European Union (EU), major charities and industry, exceeds £500 million per annum and continues to grow.

The Colleges and the University remain committed to admitting the best students regardless of their background and to investing considerable resources both in widening access and financial support. The 31 Colleges are self-governing, separate legal entities which appoint their own staff. Many academic staff are invited to join a College as a Teaching Fellow, which provides a further social and intellectual dimension. The Colleges admit students, provide student accommodation and deliver small group teaching.

The University awards degrees and its faculties and departments provide lectures and seminars for students and determine the syllabi for teaching and conducting research.

Our instinct for seeking out excellence and setting up enduring and mutually beneficial collaborations has led us to establish strategic partnerships across the globe. Whether it is the successful Cambridge-Africa Programme involving universities in Ghana, Uganda and elsewhere on the African continent; or the close association with the government of India to pursue new research in crop science; or the creation, with Germany's Max Planck Institutes, of a Cambridge-based centre for the study of ethics, human economy and social change – international partnerships are now an inextricable part of the University's make-up.

"Through its outstanding education, research and innovation, the University of Cambridge has made – and continues to make – a lasting contribution to human knowledge and is flourishing. By working at the University of Cambridge, you will be joining a vibrant community of students, scholars and professional services staff committed to supporting and enhancing the University's mission to contribute to society."

**Professor Deborah Prentice,
Vice Chancellor 2023**

Working at the University

Working at Cambridge you will join a diverse, talented and innovative community, with more than 18,000 students and over 16,000 staff from all walks of life and corners of the world.

The University continually explores strategies to attract and retain the best people. It is committed to supporting its staff to achieve their best. We are a fair, diverse and inclusive society and we believe our staff are our greatest asset. There is strong commitment to developing institutional leadership and supporting and encouraging staff development at all levels.

We offer a variety of roles including academic, research, professional, managerial and support roles. We also offer extensive benefits and excellent learning opportunities within a stimulating working environment.

The University's estate is undergoing the most significant transformation in its history. Cambridge has been able to create a new science and technology campus to the west of the city centre, and is now expanding further to the north west of Cambridge including investing in affordable homes for University key workers and community facilities. Even with our continued development, the University remains within walking or cycling distance across the campus. The University is a major partner on the Cambridge Biomedical Campus and we continue to redevelop our historic city centre sites demonstrating our determination to ensure that we can offer the best facilities and opportunities for our staff and students.

Equality & diversity

The University has built its excellence on the diversity of its staff and student community. We aim to be a leader in fostering equality and inclusion, and in promoting respect and a sense of belonging for all. We encourage applications from all sections of society. All appointments are made on the basis of merit. We have an Equal Opportunities Policy, along with a range of diversity networks for women, black and minority ethnic and lesbian, gay, bisexual and transgender staff. More details are available here: <http://www.equality.admin.cam.ac.uk/>

The University has a bronze Race Equality Charter aware, with framework for improving the representation, progression and success of minority ethnic staff and students within higher education. Furthermore, the University's Athena SWAN award recognises and celebrates good practice in recruiting, retaining and promoting women.

Living in Cambridge

Cambridge is rich in cultural diversity. From beautiful University and College buildings, museums and art galleries, quaint gardens and punts on the River Cam, to a vibrant restaurant and café scene, our employees are surrounded by the wonderful features of this unique city.

You can find a wide-range of high street shops and 3 shopping centres, with independent alternatives at the historic market and nestled within the passageways in the city centre. You will find a cinema, bowling alley, a nightclub and various live performances At the Cambridge Leisure Park, with further entertainment options at the Corn Exchange, Arts Theatre and the ADC Theatre. Further information can be found on the [Visit Cambridge](#) website.

If you prefer the faster pace of life, London is a 45 minute train journey away. For those travelling from overseas, Stansted Airport is just 45 minutes away and Heathrow Airport under 2 hours away. The University is a short distance from a host of other attractions such as Ely Cathedral, Newmarket Races and various wildlife parks and stately homes. Cambridge is also within easy reach of the beautiful Broads and coastlines of Norfolk and Suffolk.

Relocation Support

The University recognises the importance of helping individuals to move and settle into a new area. We provide support and guidance to those relocating internationally or domestically to take up a post at the University of Cambridge, liaising with other University offices and selected partners to ensure comprehensive relocation support is available. This includes: accommodation, childcare, schools, banking, immigration and transport. If you would like further information, please visit <https://www.accommodation.cam.ac.uk/>. The Shared Equity Scheme and the Reimbursement of Relocation Expenses Scheme provide financial assistance to qualifying new members of staff with the costs of relocating to Cambridge.

Accommodation Service

The University Accommodation Service helps staff, students and visiting scholars who are affiliated to the University in their search for suitable accommodation in Cambridge. The dedicated accommodation team can provide access to a wide range of University-owned furnished and unfurnished properties, and has a database of private sector accommodation available for short and long-term lets. For further information and to register with this free service please visit <https://www.accommodation.cam.ac.uk/>

What Cambridge can offer

We offer a comprehensive reward package to attract, motivate and retain high performing staff at all levels and in all areas of work.

The University offers a wide range of competitive benefits, from family leave entitlement, to shopping and travel discount schemes. Our generous annual leave package contributes to the positive wellbeing of our University employees. Sabbatical leave enables academics to focus on research and scholarship, whilst still maintaining their full salary. The University also has a career break scheme for academic and academic-related staff, with additional flexible working policies for all other staff.

Pay and benefits

The University salary structure includes automatic service-related pay progression in many of its grades and an annual cost of living increase. In addition to this, employees are rewarded for outstanding contribution through a number of regular pay progression schemes. The University offers attractive pensions schemes for employees, with an additional benefit of a salary exchange arrangement providing tax and national insurance savings. Payroll giving is also a simple, tax-efficient way for employees to make monthly donations to charity.

CAMbens employee benefits

The University offers employees a wide range of competitive benefits, known as CAMbens. CAMbens offers something for everyone across a range of categories, including:

- Financial Benefits, including shopping discounts (both local and national) and a Payroll Giving scheme;
- Relocation and Accommodation Benefits, including relocation assistance and interest-free Rental Deposit Loans;
- Travel Benefits, including Cycle to Work, discounts on train season tickets and interest-free Travel to Work loans;
- Family Friendly and Lifestyle Benefits, including support with childcare and family friendly policies;
- Health and Wellbeing Benefits, including a University Staff Counselling Service, discounts at the University Sports Centre, and other local gyms, and healthcare schemes.

What Cambridge can offer

Family-friendly policies

The University recognises the importance of supporting its staff. We have a range of family-friendly policies to aid employees' work-life balance including a generous maternity, adoption and shared parental leave entitlement of 18 weeks full pay and emergency family care support via My Family Care.

Other family-friendly support includes:

Our highly regarded workplace nurseries, a childcare salary exchange scheme and a high quality holiday Playscheme may be available to help support University employees with caring responsibilities (subject to demand and qualifying criteria). Further childcare information can be found here:

<https://www.childcare.admin.cam.ac.uk/>

The Newcomers and Visiting Scholars Group is an organisation within the University run by volunteers whose aim is to help newly arrived wives, husbands, partners and families of Visiting Scholars and members of the University to settle in Cambridge and give them an opportunity to meet local people. The Office of Postdoctoral Affairs supports the postdoctoral community within Cambridge. Further details are available here: <https://www.opda.cam.ac.uk/>

Your wellbeing

The University's Sport Centre, Counselling Services and Occupational Health are just some of the support services available to University employees to promote their physical and mental wellbeing. There are many societies in Cambridge catering for almost every taste and interest. Whether you want to take part in a sport, participate in music or drama, pursue a hobby, or join a political group, you will almost certainly find that a society exists for this purpose. The University also hosts the [Cambridge Science Festival](#) and [Cambridge Festival of Ideas](#), as well as [Open Cambridge](#) weekend, which together attract over 50,000 visitors per year. The festivals are a great opportunity to get your first taste of public engagement, through volunteering, supporting hands-on activities or proposing a talk.

Development opportunities

We support new employees to settle in through various activities. The encouragement of career development for all staff is one of the University's values and we put this into practice through various services and initiatives. Our Personal and Professional Development Department provides development opportunities and courses for all University employees. These include face-to-face sessions, online learning modules and webinars. Employees may also apply for financial support to undertake training that will lead to a qualification. We offer reduced staff fees for University of Cambridge graduate courses and the opportunity to attend lectures and seminars held by University departments and institutions. Apprenticeship programmes are also available to support employees to develop their skills, experience and qualifications.

Clinical School Benefits

Cambridge Biomedical Campus

Being based on Cambridge Biomedical Campus gives the University of Cambridge School of Clinical Medicine employees an unrivalled range of on-site amenities.

These include:

Core amenities

- Marks & Spencer Simply Food
- Clothes & Gift shops
- The Body Shop
- Newsagent
- Barclays Bank
- Hairdressers
- Costa Coffee/Starbucks
- Various food outlets

Sports and Leisure

The Frank Lee Sports and Leisure Centre on the Campus is open to everyone who works on the Campus including employees of companies. The Centre offers a comprehensive range of activities for both adults and children (during the school holidays). Facilities include a 25m heated indoor pool, tennis and squash courts, cardio gym and fitness rooms. There is also a licensed bar, restaurant and function rooms.

Childcare

Bright Horizons Long Road nursery is located on the Campus making it an ideal location for parents who work at the site. The nursery is purpose built and houses five home bases, each designed specifically for babies, toddlers and pre-school children, as well as a spacious and secure external area in which children can play and explore the outdoors.

Apprenticeship opportunities

These are available for new and current members of staff to earn while they learn. The University is committed to nurturing talent and developing expertise through providing relevant vocational and professional apprenticeships across all of its departments and institutions.

Clinical School Wellbeing Programme

Following the launch of the Clinical School Wellbeing Programme in April 2014 it has continued to develop and grow each year. The School holds regular wellbeing talks and events in addition to hosting two dedicated Wellbeing Weeks packed with activities for staff each year. Activities include staff massages, smoothie bikes, step challenges, arts and crafts sessions and many more.

The School also has a team of Mental Health First Aiders recruited and trained from our own pool of staff. The School is always looking for new ways to engage staff and encourage them to look after their physical and mental wellbeing.

Equality, Diversity and Inclusion

The School of Clinical Medicine has a dedicated governance group overseeing equality, diversity and inclusion related activities. Regular talks are held throughout the year and all staff members are expected to undertake Equality and Diversity training.

The School has a number of networks for different staff groups encouraging communication and sharing of practices. There is also a growing network of 100+ Equality Champions who meet termly and help raise awareness of equality, diversity and inclusion within their departments. The School currently holds a silver Athena SWAN award utilising the process to critically analyse all areas of equality and diversity within the school.

How to apply

Applications should be submitted online via the University of Cambridge jobs page www.jobs.cam.ac.uk by clicking “Apply online” in the job advert. You will need an email address to register for our online system.

Conversations about flexible working are encouraged at the University of Cambridge. Please feel free to discuss flexibility prior to applying (using the contact information below) or at interview if your application is successful.

Informal enquiries are welcomed and should be directed to:

Daniel Fazakerley

Email: djf72@cam.ac.uk

If you have any queries regarding the application process please contact the Recruitment team at:

clinbiohr@admin.cam.ac.uk

The closing date for applications is: 9th April 2025

The interview date for the role is: To be confirmed – towards the end of April.
