

Research Associate

Department of Clinical Neurosciences

Closing date: 6th April 2025
Job Reference: ZE45378

Research Associate

Salary:

£37,174 - £45,413 per annum

Contract:

Fixed Term – 2 years

Location:

Cambridge Biomedical Campus

Department:

Clinical Neurosciences

Responsible to:

Caroline Williams-Gray

Working Pattern:

Full Time

Purpose of the role

This postdoctoral research role will support an expanding programme of Parkinson's disease research within the Williams-Gray lab. The lab works at the interface of clinical and laboratory science; a key goal being to better understand the clinical heterogeneity of Parkinson's disease and the underlying biological basis of this, with a view to developing more targeted and personalized therapies. This role will focus particularly on the role of gut dysfunction and ghrelin as a therapeutic target in Parkinson's disease.

The post holder will play an integral role in establishing an interventional study to investigate whether ginger extract increases ghrelin levels in the blood, and whether this is associated with changes in gut function and inflammation as well as clinical measures of motor and cognitive function. In addition, they will have the opportunity to contribute to related projects running within the lab, including biomarker studies and clinical trials.

The role will support and maintain the University's national and international reputation for excellence in teaching and research. Contribution to excellence in research will involve carrying out research at a similar level to that undertaken by lecturing staff and will provide substantial scope for academic judgement, originality, interpretation and presentation of results.

The role holder will be expected to present data at national and international meetings, and to prepare manuscripts for publication. They will also be expected to assist with grant administration and the writing of reports for funding bodies. Contribution to teaching will include assistance in the presentation of seminars and may include participation in the department's teaching programme.

Key responsibilities**Research and scholarship:**

- Manage the day to day running of a longitudinal interventional study investigating the effect of ginger on inflammation, gut function and motor and cognitive decline in Parkinson's disease;
- Conduct cognitive and motor assessments in research participants;
- Conduct wet-lab assays;
- Contribute to collaborative research projects;
- Conduct data analysis using appropriate statistical techniques;
- Write up research work for presentation and publication;
- Continually update knowledge and understanding in the field of work relevant to the work of the Williams-Gray group;
- Assist in the preparation of proposals and applications to external bodies, e.g. for funding and contractual purposes;
- Communicate material of a specialist or highly technical nature to a variety of audiences.

Teaching and learning support

- Assist in the supervision of student projects;
- Assist in the development of student research skills;
- Plan and deliver seminars relating to research area.

Liaison and networking:

- Liaise with colleagues and students;
- Build internal and external contacts and participate in networks for the exchange of information and to form relationships for future collaboration.

Planning and organising:

- Plan the use of research resources, laboratories and workshops as appropriate;
- Plan and manage own research and administrative activity in collaboration with others;
- Contribute to planning of joint research projects led by principal investigator.

Person Specification

Criteria	Essential	Desirable
Education		
Holds a PhD in clinical neuroscience/biological sciences, or equivalent clinical research experience.	✓	
Essential knowledge, skills and experience required for the role		
Sufficient breadth/depth of specialist knowledge in clinical research methods and techniques to work within an established clinical research programme.	✓	
Experience and specialist knowledge in the field of neurodegeneration and/or gut disorders	✓	
Experience in patient-facing research	✓	
Will continually update knowledge in the specialist area and engage in continuous professional development.	✓	
Experience of managing own workload	✓	
Ability to maintain meticulous data records and analyse data using relevant statistical software packages.	✓	
At least 1 year of postdoctoral, or equivalent, experience in a clinical research role is desirable		✓
Experience of working with human biosamples and wet-lab assays		✓
Interpersonal & communication skills		
Good IT and communication skills	✓	
Ability to work independently and as part of a team.	✓	
Excellent organisational and record keeping skills	✓	

Behavioural Attributes

This section summarises the behavioural attributes (or competencies) that we expect the role holder to be able to demonstrate, at what level and whether this is an essential or desirable requirement.

Attribute	Level
Valuing Diversity Considers and respects the ideas, circumstances and feelings of others. Treats everyone with fairness and respect, adhering to the principles of diversity and inclusion.	A
Achieving Results Identifies and manages important issues and problems effectively. Plans and monitors the work of others and takes accountability for their levels of performance and success.	B
Communication Communicates effectively and appropriately with senior management, external partners and with people at all levels across the University and outside the University in the wider community.	B
Innovation and Change Supports, promotes and implements change. Encourages the adoption of new methods and overcomes barriers to acceptance.	B
Negotiating and Influencing Negotiates and influences at senior management level using persuasive arguments. Identifies clear aims in negotiations and achieves satisfactory outcomes.	B
People Development Encourages and facilitates the learning and development of others. Demonstrates enhancement of individual and team potential through giving clear direction, guidance and feedback on performance.	B
Relationship Building Develops and maintains existing partnerships. Builds teams and identifies means of enhancing their effectiveness.	B
Strategic Focus Takes a strategic view and creates long-term plans for the institution/area of responsibility. Promotes a shared vision for the University.	B

Department of Clinical Neurosciences

The Department of Clinical Neurosciences is located at the Cambridge Biomedical Campus and currently hosts over 300 academic and associated staff. The aim of the Department is to understand the nervous system in health and disease in order to develop new treatments for incurable neurological disorders. Embedded within Cambridge University Hospitals, our research questions stem from problems we have encountered in the clinic, and directly address the needs of patients and families.

Research Themes

Our research is arranged in a number of related themes and integrated with major University, national and international research centres. This research is directly supported by a number of cross-cutting capabilities and clinical disciplines, including the most advanced brain imaging centre in Europe. Our principal research themes are;

- Dementia and Neurodegeneration,
- Hearing and Vision,
- Neuroinflammation,
- Rare Neurological Disorders,
- Stroke,
- Traumatic Brain Injury and Disorders of Consciousness,
- Stem Cell Neurobiology.

Our cross-cutting capabilities span large areas of experimental and clinical neuroscience, conducting independent research and research in support of the Department's major themes.

This vibrant and multidisciplinary research environment comprises the John van Geest Centre for Brain Repair, Wolfson Brain Imaging Centre, and Neuroimaging.

Additionally, the Department hosts major research centres in the form of the Cambridge Centre for Frontotemporal Dementia, the Cambridge Centre for Parkinson's Plus and the Cambridge hub of the UK Dementia Research Institute.

Neurology and Neurosurgery

We are home to two leading neurology and neurosurgical units in Europe. In neurology, we have particular interests in Parkinson's disease, frontotemporal dementia, Alzheimer's disease, stroke, Multiple Sclerosis (MS) and genetic neurological disorders including mitochondrial diseases. The Unit combines experimental, informatics. Our many techniques include genomics; molecular, stem cell, and computational biologies; disease modelling, advanced imaging and artificial intelligence.

Our academic neurosurgery unit has major interests in acute head injury and disorders of consciousness (together with anaesthetics), glioma biology and treatment, developing new methods of bedside patient monitoring, the dynamics of the blood-brain barrier, brain haemorrhage and novel methods of imaging the damaged brain.

Professor Alistair Coles, Head of Department

School of Clinical Medicine

Doing great work in a great place to work

About the School

The School of Clinical Medicine currently employs nearly 3,000 people, spanning all varieties of staff type from Academic Professors to administrative support.

In 1976 in response to the recommendation of the Royal Commission on Medical Education in the late 1960's, a complete medical course was re-established in Cambridge with the opening of the School of Clinical Medicine at the new Addenbrooke's Hospital site.

On 21st November 1980, HRH The Duke of Edinburgh, the Chancellor of the University of Cambridge, officially opened the Clinical School Building which presently accommodates the medical library, lecture theatres and seminar rooms.

The University of Cambridge School of Clinical Medicine aspires to change the practice of medicine and improve biological understanding in a wide range of clinical specialties and scientific disciplines. Collaborative research, both within biomedicine and crossing the boundaries to the mathematical, physical and social sciences, is key to our approach. The School also supports key enabling technologies and facilities in imaging, bioinformatics and biological systems. The main areas of research interest are:

- Cancer research
- Cardio-Respiratory Medicine
- Cellular mechanisms of disease
- Diabetes, Endocrinology and Metabolism
- Epidemiology, Public Health and Primary Care
- Genetics and Genetic Medicine
- Haematological and Transplantation Medicine
- Infection and Immunity
- Neurosciences and Mental Health
- Stems Cells and Regenerative Medicine.

Professor Patrick Maxwell, Regius Professor of Physic and Head of the School of Clinical Medicine

The School aims to provide leadership in education, discovery and healthcare. It will achieve this through; inspirational teaching and training, outstanding basic and clinical research and integration of these to improve medical practice for both individual patients and the population.

The School will:

Through inspirational teaching and training, educate individuals who:

- will become exceptional doctors or biomedical scientists
- combine a depth of scientific understanding with outstanding clinical and communication skills demonstrate a caring, compassionate and professional approach to patients and the public and
- are equipped to become future international leaders of their profession.

Through its commitment to the pursuit of excellence, support scientists of international standing in basic and clinical research aiming to:

- understand fundamental biology and thereby the mechanisms underlying disease integrate basic and clinical research
- apply a rigorous mechanism-based approach to clinical problems and
- innovate to solve the health challenges of our society.

UK Dementia Research Institute

The UK Dementia Research Institute (UK DRI) is the biggest UK initiative supporting research to fill the major knowledge gap in our basic understanding of the diseases that cause dementia.

We are a globally leading multidisciplinary research institute of over 700 staff investigating the spectrum of neurodegenerative disorders causing dementia, driving a step change in our understanding of neurodegeneration and accelerating the discovery, development and delivery of interventions that will help diagnose, treat and ultimately prevent dementia.

Our laboratory-based research groups are located at University College London, the University of Cambridge, Cardiff University, Edinburgh University, Imperial College London and King's College London.

Dementia is the biggest health challenge of our century – currently affecting fifty million people worldwide, projected to triple by 2050, with huge financial, emotional and social impact on people directly affected, their carers, families and the community.

Dementia is a symptom of several neurodegenerative disorders, with Alzheimer's disease accounting for about 60% of cases. To date there is no way to prevent or even slow the rate of progression of neurodegeneration.

UK DRI at Cambridge

Due to an ageing population in the UK, we are expecting an increase in the number of people developing neurodegenerative diseases over the coming decades. But developing new treatments that can prevent the onset of disease or protect neurons from damage is hindered by our lack of knowledge in the fundamental causes and mechanisms behind neurodegeneration.

Scientists at the UK DRI at Cambridge use cutting-edge approaches to build our understanding of the biological processes behind the earliest stages of neurodegeneration and ageing. They explore mechanisms causing the loss of vital connections between neurons and the pathways that drive repair of these connections, which are essential for memory formation and survival of brain cells and identify key molecular targets for translation into effective treatments to stop, slow or reverse dementia.

Terms of Appointment

Tenure and probation

Appointment will be made on a fixed-term basis. Funding is available in the first instance for 2 years.

Appointments will be subject to satisfactory completion of a six-month probationary period.

Hours of Work and Working Pattern

The hours of work for the position are 37 hours per week, working Monday –Friday. Your times of work will be notified to you by your institution.

Pension

You will automatically be enrolled to become a member of USS (Universities Superannuation Scheme) – a defined benefits pension scheme. For further information please visit: www.pensions.admin.cam.ac.uk.

Annual leave

Full time employees are entitled to annual paid leave of 41 days inclusive of public holidays. For new part-time employees, annual leave will be pro rata'd based on days worked.

General information Pre-employment checks

Right to work in the UK

We have a legal responsibility to ensure that you have the right to work in the UK before you can start working for us.

If you do not have the right to work in the UK already, any offer of employment we make to you will be conditional upon you gaining it.

Health declaration

Once an offer of employment has been made the successful candidate will be required to complete a work health declaration form.

Qualifications

The person specification for this position lists qualifications that are essential and/or desirable. Please note that if you are offered the post you will be asked to provide your relevant original certificates of these qualifications.

References

Offers of appointment will be subject to the receipt of satisfactory references.

Screening checks

This role requires a standard Disclosure and Barring Service (DBS) Check. Any offer of employment we make to you will be conditional upon the satisfactory completion of this check; whether an outcome is satisfactory will be determined by the University. The role requires a Research Passport with the relevant Trust.

Information if you have a disability

The University welcomes applications from individuals with disabilities. We are committed to ensuring fair treatment throughout the recruitment process. We will make adjustments to enable applicants to compete to the best of their ability wherever it is reasonable to do so and, if successful, to assist them during their employment.

Information for disabled applicants is available at

<http://www.admin.cam.ac.uk/office/s/hr/staff/disabled/>

We encourage you to declare any disability that you may have, and any reasonable adjustments that you may require, in the section provided for this purpose in the application form. This will enable us to accommodate your needs throughout the process as required. However, applicants and employees may declare a disability at any time.

If you prefer to discuss any special arrangements connected with a disability, please contact, the Department Administrator who is responsible for recruitment to this position. Alternatively, you may contact the Clinical School Recruitment Team who are responsible for recruitment to this position via:

cshrstaffhub@admin.cam.ac.uk

The University

The University of Cambridge is one of the world's oldest and most successful universities. We are a renowned centre for research, education, and scholarship that makes a significant contribution to society. The University is consistently ranked amongst the top universities in the world. Our affiliates have won more Nobel Prizes than any other University.

Our sustained pursuit of academic excellence is built on a long history of first-class teaching and research within a distinctive collegiate system. For eight centuries our ideas and innovations have shaped the world. Our principal goal is to remain one of the world's leading universities in an increasingly competitive global higher education sector. Today the University of Cambridge is at the centre of a cluster of over 4,300 businesses employing 58,000 people.

Our capital investment projects include the West Cambridge site, the North West Cambridge development and the growth of the Biomedical Campus in the south of the city. The North West Cambridge development includes the opening of a primary school – the first in the UK to be managed by a University. So we are deeply embedded in, and committed to serving, our local community. These are all conspicuous signs of a University that is not only adapting to new needs, but also anticipating the future.

Our mission is to contribute to society through the pursuit of education, learning, and research at the highest international levels of excellence. Our core values are:

- freedom of thought and expression; and
- freedom from discrimination.

About Us

The University is one of the world's leading academic centres. It comprises 150 faculties and departments, together with a central administration and other institutions. Our institutions, museums and collections are a world-class resource for researchers, students and members of the public representing one of the country's highest concentrations of internationally important collections.

The University has an annual income of £2 billion. Research income, won competitively from the UK Research Councils, the European Union (EU), major charities and industry, exceeds £500 million per annum and continues to grow.

The Colleges and the University remain committed to admitting the best students regardless of their background and to investing considerable resources both in widening access and financial support. The 31 Colleges are self-governing, separate legal entities which appoint their own staff. Many academic staff are invited to join a College as a Teaching Fellow, which provides a further social and intellectual dimension. The Colleges admit students, provide student accommodation and deliver small group teaching.

The University awards degrees and its faculties and departments provide lectures and seminars for students and determine the syllabi for teaching and conducting research.

Our instinct for seeking out excellence and setting up enduring and mutually beneficial collaborations has led us to establish strategic partnerships across the globe. Whether it is the successful Cambridge-Africa Programme involving universities in Ghana, Uganda and elsewhere on the African continent; or the close association with the government of India to pursue new research in crop science; or the creation, with Germany's Max Planck Institutes, of a Cambridge-based centre for the study of ethics, human economy and social change – international partnerships are now an inextricable part of the University's make-up.

“Through its outstanding education, research and innovation, the University of Cambridge has made – and continues to make – a lasting contribution to human knowledge and is flourishing. By working at the University of Cambridge, you will be joining a vibrant community of students, scholars and professional services staff committed to supporting and enhancing the University's mission to contribute to society.”

Prof Deborah Prentice, Vice
Chancellor 2023

Working at the University

Working at Cambridge you will join a diverse, talented and innovative community, with more than 18,000 students and over 16,000 staff from all walks of life and corners of the world.

The University continually explores strategies to attract and retain the best people. It is committed to supporting its staff to achieve their best. We are a fair, diverse and inclusive society and we believe our staff are our greatest asset. There is strong commitment to developing institutional leadership and supporting and encouraging staff development at all levels.

We offer a variety of roles including academic, research, professional, managerial and support roles. We also offer extensive benefits and excellent learning opportunities within a stimulating working environment.

The University's estate is undergoing the most significant transformation in its history. Cambridge has been able to create a new science and technology campus to the west of the city centre, and is now expanding further to the north west of Cambridge including investing in affordable homes for University key workers and community facilities. Even with our continued development, the University remains within walking or cycling distance across the campus. The University is a major partner on the Cambridge Biomedical Campus and we continue to redevelop our historic city centre sites demonstrating our determination to ensure that we can offer the best facilities and opportunities for our staff and students.

Equality & diversity

The University has built its excellence on the diversity of its staff and student community. We aim to be a leader in fostering equality and inclusion, and in promoting respect and a sense of belonging for all. We encourage applications from all sections of society. All appointments are made on the basis of merit. We have an Equal Opportunities Policy, along with a range of diversity networks for women, black and minority ethnic and lesbian, gay, bisexual and transgender staff. More details are available here: <http://www.equality.admin.cam.ac.uk/>

The University has a bronze Race Equality Charter aware, with framework for improving the representation, progression and success of minority ethnic staff and students within higher education. Furthermore, the University's Athena SWAN award recognises and celebrates good practice in recruiting, retaining and promoting women.

Living in Cambridge

Cambridge is rich in cultural diversity. From beautiful University and College buildings, museums and art galleries, quaint gardens and punts on the River Cam, to a vibrant restaurant and café scene, our employees are surrounded by the wonderful features of this unique city.

You can find a wide-range of high street shops and 3 shopping centres, with independent alternatives at the historic market and nestled within the passageways in the city centre. You will find a cinema, bowling alley, a nightclub and various live performances At the Cambridge Leisure Park, with further entertainment options at the Corn Exchange, Arts Theatre and the ADC Theatre. Further information can be found on the [Visit Cambridge](#) website.

If you prefer the faster pace of life, London is a 45 minute train journey away. For those travelling from overseas, Stansted Airport is just 45 minutes away and Heathrow Airport under 2 hours away. The University is a short distance from a host of other attractions such as Ely Cathedral, Newmarket Races and various wildlife parks and stately homes. Cambridge is also within easy reach of the beautiful Broads and coastlines of Norfolk and Suffolk.

Relocation Support

The University recognises the importance of helping individuals to move and settle into a new area. We provide support and guidance to those relocating internationally or domestically to take up a post at the University of Cambridge, liaising with other University offices and selected partners to ensure comprehensive relocation support is available. This includes: accommodation, childcare, schools, banking, immigration and transport. If you would like further information, please visit <https://www.accommodation.cam.ac.uk/>. The Shared Equity Scheme and the Reimbursement of Relocation Expenses Scheme provide financial assistance to qualifying new members of staff with the costs of relocating to Cambridge.

Accommodation Service

The University Accommodation Service helps staff, students and visiting scholars who are affiliated to the University in their search for suitable accommodation in Cambridge. The dedicated accommodation team can provide access to a wide range of University-owned furnished and unfurnished properties, and has a database of private sector accommodation available for short and long-term lets. For further information and to register with this free service please visit <https://www.accommodation.cam.ac.uk/>

What Cambridge can offer

We offer a comprehensive reward package to attract, motivate and retain high performing staff at all levels and in all areas of work.

The University offers a wide range of competitive benefits, from family leave entitlement, to shopping and travel discount schemes. Our generous annual leave package contributes to the positive wellbeing of our University employees. Sabbatical leave enables academics to focus on research and scholarship, whilst still maintaining their full salary. The University also has a career break scheme for academic and academic-related staff, with additional flexible working policies for all other staff.

Pay and benefits

The University salary structure includes automatic service-related pay progression in many of its grades and an annual cost of living increase. In addition to this, employees are rewarded for outstanding contribution through a number of regular pay progression schemes. The University offers attractive pensions schemes for employees, with an additional benefit of a salary exchange arrangement providing tax and national insurance savings. Payroll giving is also a simple, tax-efficient way for employees to make monthly donations to charity.

CAMbens employee benefits

We offer a CAMbens scheme for University employees, providing access to online and in-store shopping discounts and cashback. With more than 2,000 participating retailers, employees can save money on a wide range of household expenses, from groceries and clothes, to holidays and insurance and much more. A range of local discounts are also available, helping employees to save money whilst also supporting local Cambridge businesses and a CAMbens Cycle to Work salary sacrifice scheme is also available, which enables employees to save money on transport costs. A 10% discount rate on the purchase of train season tickets, bulk buy tickets and an interest free travel to work loan are also available for staff of the University.

What Cambridge can offer

Family-friendly policies

The University recognises the importance of supporting its staff. We have a range of family-friendly policies to aid employees' work-life balance including a generous maternity, adoption and shared parental leave entitlement of 18 weeks full pay and emergency family care support via My Family Care.

Other family-friendly support includes:

Our highly regarded workplace nurseries, a childcare salary exchange scheme and a high quality holiday Playscheme may be available to help support University employees with caring responsibilities (subject to demand and qualifying criteria). Further childcare information can be found here:

<https://www.childcare.admin.cam.ac.uk/>

The Newcomers and Visiting Scholars Group is an organisation within the University run by volunteers whose aim is to help newly arrived wives, husbands, partners and families of Visiting Scholars and members of the University to settle in Cambridge and give them an opportunity to meet local people. The Office of Postdoctoral Affairs supports the postdoctoral community within Cambridge. Further details are available here: <https://www.opda.cam.ac.uk/>

Your wellbeing

The University's Sport Centre, Counselling Services and Occupational Health are just some of the support services available to University employees to promote their physical and mental wellbeing. There are many societies in Cambridge catering for almost every taste and interest. Whether you want to take part in a sport, participate in music or drama, pursue a hobby, or join a political group, you will almost certainly find that a society exists for this purpose. The University also hosts the [Cambridge Science Festival](#) and [Cambridge Festival of Ideas](#), as well as [Open Cambridge](#) weekend, which together attract over 50,000 visitors per year. The festivals are a great opportunity to get your first taste of public engagement, through volunteering, supporting hands-on activities or proposing a talk.

Development opportunities

We support new employees to settle in through various activities. The encouragement of career development for all staff is one of the University's values and we put this into practice through various services and initiatives. Our Personal and Professional Development Department provides development opportunities and courses for all University employees. These include face-to-face sessions, online learning modules and webinars. Employees may also apply for financial support to undertake training that will lead to a qualification. We offer reduced staff fees for University of Cambridge graduate courses and the opportunity to attend lectures and seminars held by University departments and institutions. Apprenticeship programmes are also available to support employees to develop their skills, experience and qualifications.

Clinical School Benefits

Cambridge Biomedical Campus

Being based on Cambridge Biomedical Campus gives the University of Cambridge School of Clinical Medicine employees an unrivalled range of on-site amenities.

These include:

Core amenities

- Marks & Spencer Simply Food
- Clothes & Gift shops
- The Body Shop
- Newsagent
- Barclays Bank
- Hairdressers
- Costa Coffee/Starbucks
- Various food outlets

Sports and Leisure

The Frank Lee Sports and Leisure Centre on the Campus is open to everyone who works on the Campus including employees of companies. The Centre offers a comprehensive range of activities for both adults and children (during the school holidays). Facilities include a 25m heated indoor pool, tennis and squash courts, cardio gym and fitness rooms. There is also a licensed bar, restaurant and function rooms.

Childcare

Bright Horizons Long Road nursery is located on the Campus making it an ideal location for parents who work at the site. The nursery is purpose built and houses five home bases, each designed specifically for babies, toddlers and pre-school children, as well as a spacious and secure external area in which children can play and explore the outdoors.

Apprenticeship opportunities

These are available for new and current members of staff to earn while they learn. The University is committed to nurturing talent and developing expertise through providing relevant vocational and professional apprenticeships across all of its departments and institutions.

Clinical School Wellbeing Programme

Following the launch of the Clinical School Wellbeing Programme in April 2014 it has continued to develop and grow each year. The School holds regular wellbeing talks and events in addition to hosting two dedicated Wellbeing Weeks packed with activities for staff each year. Activities include staff massages, smoothie bikes, step challenges, arts and crafts sessions and many more.

The School also has a team of Mental Health First Aiders recruited and trained from our own pool of staff. The School is always looking for new ways to engage staff and encourage them to look after their physical and mental wellbeing.

Equality, Diversity and Inclusion

The School of Clinical Medicine has a dedicated governance group overseeing equality, diversity and inclusion related activities. Regular talks are held throughout the year and all staff members are expected to undertake Equality and Diversity training.

The School has a number of networks for different staff groups encouraging communication and sharing of practices. There is also a growing network of 100+ Equality Champions who meet termly and help raise awareness of equality, diversity and inclusion within their departments. The School currently holds a silver Athena SWAN award utilising the process to critically analyse all areas of equality and diversity within the school.

How to apply

Applications should be submitted online via the University of Cambridge jobs page www.jobs.cam.ac.uk by clicking “Apply online” in the job advert. You will need an email address to register for our online system.

Conversations about flexible working are encouraged at the University of Cambridge. Please feel free to discuss flexibility prior to applying (using the contact information below) or at interview if your application is successful.

If you have any queries regarding the application process please contact **ClinNeuroHR@medschl.cam.ac.uk**

The closing date for applications is: **6th April 2025**

The interview date for the role is: **To be confirmed**
